

EMR-validated handrail scale with ID-Display and height measurement

seca Scale-up Ultra

- + Display shows user and patient names or IDs for increased patient safety
- + Outstanding precision and high-speed measuring thanks to perfected ultrasound technology
- + Large platform made of tested seca Bearclaw Glass® for absolute breakage resistance and perfect hygiene
- + Illuminated LED footprints in the weighing platform show patients the correct standing position for accurate height measurement
- + Voice guidance to support the measurement process
- + Safe weighing with a stable handrail
- + Optional animal sticker facilitates measuring and weighing of children
- + EMR-validated: transmit measured data directly to an electronic medical record system or printer

EMR-validated handrail scale with ID-Display and height measurement

State-of-the-art height measurement

Measurement with ultrasound is probably the most elegant method to determine patient height. Using three pairs of sensors, the measurement is not only exact, it can be done completely hands-free, with clinician several feet away. The optional, automated voice guidance feature and illuminated foot prints support the measurement process. This provides an optimal workflow, eliminates a source of cross-infection and delivers high-precision results in seconds.

One measuring station for all requirements

Weighing, measuring and transfer of data immediately into the digital patient file (EMR) – this guarantees an efficient and safe workflow. With its large measuring and weighing range, the seca Scale-up Ultra is suitable for children as well as for adults. The glass platform not only looks good, but is easy and quick to clean and therefore very hygienic. Enormous platform strength is ensured by the use of specially-developed seca Bearclaw Glass®.

Approval class	III
Capacity	300 kg
Graduation	50 g < 150 kg > 100 g
Dimensions (WxHxD)	801 × 2,387 × 650 mm / 31.5 × 94 × 25.6 in
Platform (WxHxD)	600 × 70 × 467 mm / 23.6 × 2.8 × 18.4 in
Net weight	29 kg / 63.9 lbs
Power supply	Power adapter
Functions	Display of user and patient name or ID, Display date of birth patient, TARE, Pre-TARE, HOLD, Auto-HOLD, CLEAR, Auto-CLEAR, RESET, Automatic weighing range switch-over, Adjustable damping, Auto-BMI, Auto-BSA (Body surface area), Mother+child function, Standby mode, SEND/Auto-SEND
Interfaces	Ethernet, USB for barcode scanner, Wi-Fi
Accessories	+ Barcode scanner mount seca 463 + Animal sticker seca 487
Medical Device Regulation (MDR) certified	

ID-Display ensures easy and user-friendly data transmission to EMR systems

seca Scale-up Ultra is developed especially for perfect integration of measured data into the EMR. Weight and data such as time of measurement are stored centrally and accessible for every user. The ID-Display shows name or patient ID with every measurement, which are gathered by an additional barcode scanner. This makes the integration process transparent, safe and even more user-friendly.

Ultrasonic height measurement

Measuring range seca 257	100 – 220 cm / 3 ft 3" – 7 ft 2"
Measuring range seca 257 sh	100 – 200 cm / 3 ft 3" – 6 ft 7"
Graduation	1 mm / 1/8 in
